Sub: Boiler Operation Engineer Rules, 2011- clarification regarding B.E. in Instrumentation and Control Engineering

Dear Sir,

I am to refer to rule 31(a) of the Boiler Operation Engineer Rules, 2011 wherein it has been prescribed that a candidate for the certificate of proficiency for Boiler Operation Engineer(BOE) shall possess a degree or diploma in Mechanical or Electrical or Chemical or Power Plant or Production or **Instrumentation** Engineering from a recognized institution.

A representation has been received for treating "B.E. degree in Instrumentation and Control Engineering" equivalent to B.E. in Instrumentation Engineering.

As the B.E. degree in Instrumentation and Control Engineering" can be treated equivalent to B.E. in Instrumentation Engineering , in rule 31(a) of the Boiler Operation Engineer Rules, 2011 "B.E (Instrumentation and Control Engineering)" may be treated at par with "B.E (Instrumentation Engineering)".

Thanking you,

Yours Sincerely,

(T. S. G. Narayannen)
